EnPress Journals

Subject: Submission of a Manuscript.

Dear Sir,

We are submitting herewith our manuscript entitled “**Various approaches for synthesis of benzimidazole derivatives and their catalytic application for organic transformation**” for publication in Applied Chemical Engineering. We strongly believe that our contribution is suitable for publication in Applied Chemical Engineering. In this paper we report the various methods for synthesis of benzimidazole derivatives and its metal complexes. We also reported the different catalytic application of metal complexes particularity for organic transformation. This study provides the comprehensive overview of the recent major advancement in synthesis and applications

For this, we consider that **Applied Chemical Engineering** will be the appropriate forum to disseminate our results. We declare that the manuscript is original and have not been published or considered for publication in any other journal. We hope that you find our manuscript suitable for publication in Applied Chemical Engineering -EnPress Journals.

Looking forward to hear a positive review and reply from you.

Thanking you and best regards

Sincerely

Dr. Ravinder Kumar
