To The Chief Editor

Subject: Submission of a Manuscript.

Dear Sir,

We are herewith sending you a manuscript entitled: "Morphology based catalytic oxidation of phenyl propyne into 1,2-diketones, aldehyde and acid using Cu(II) complex" for its kind evaluation and publication in your esteemed journal. In this paper we report the synthesis N-methyl benzimidazolyl schiff base copper(II) complex. The geometry of this complex is observed by Le-Bail fitting pattern using PXRD, UV-Vis, CV and EPR studies shows a distorted square planer geometry. This complex is used for the oxidation of 1-phenylpropyne to corresponding 1,2-diketone, aldehyde and acid, heterogeneously. The products are analyzed by GC-MS. Changes occur during catalysis in surface morphology analyzed by SEM.

For this, we consider that your journal will be the appropriate forum to disseminate our results. We declare that the manuscript is original and have not been published or considered for publication in any other journal. We hope that you find our manuscript suitable for publication.

Looking forward to hear a positive review and reply from you.

Thanking you and best regards

Sincerely

Dr. Ravinder Kumar
